MEMORANDUM FOR: Chief, Engineering, OC
THRU : Chief, Operations, OC
INFO : Chief, Engineering Division, [REDACTED]
FROM : [REDACTED]
SUBJECT : Air Condition Study for [REDACTED] (U)

FILE
18 NOV 1977

1. (U) An adhoc air condition study group made up of representatives from OC-E, [REDACTED] Engineering met with [REDACTED] on Tuesday 8 November [REDACTED]. The main topic of discussion was the current and projected equipment heat load to the [REDACTED] A/C system.

2. (U) It was pointed out to [REDACTED] that the current utility room is being considered for a possible office complex expansion or to house the planned MAX replacement circa 1982. [REDACTED] will need a commitment from OC within 30 days on whether the current utility room will be available for the projected air condition system or whether a new utility building will be erected.

3. (U) [REDACTED] regards the use of the utility room for office space to be insufficient. Currently 2700 square feet is needed for office space and this room can offer only 1350 square feet of useable floor space.

4. (C) Your early attention and decision on this matter would be appreciated. For any further information please contact [REDACTED] on Green Ext. [REDACTED]
